Dear Customer,

As a partner company of the globally successful Würth Group, we have made an international name for ourselves with our innovative solutions for sanitary and heating systems as well as solar thermal systems. IVT has state-of-the-art production facilities at its headquarters in Rohr near Nuremberg.

We realize national as well as international projects - from single-family homes to large-scale projects.

SERVICE is a top priority for us! Our 24-hour service usually enables delivery within 24 hours. Furthermore, our service level of 99.8 % ensures that virtually all items are available for immediate delivery. Customer orientation, and thus a long-term customer relationship based on partnership, are our top priority. With qualified specialist planners, we support you in the planning of your properties. Our competent technical advisors will be happy to answer any questions you may have about PRINETO, stainless steel and LATENTO.

Ingrid Zürn and Ralf Stottok, Managing Directors

Subsidiary of the globally active Würth Group

IVT was founded in 1994 and has been a wholly owned subsidiary of the Würth Group since 2015. Our customers benefit from this twice over: On the one hand, from the flexibility and high customer orientation of a medium-sized company. On the other hand, from the security and continuity of a global corporation.

Direct sales without intermediaries

Whether plumbing, heating or solar - we stand for efficient solutions in the field of modern heating systems. Our qualified IVT consultants support you directly and without detours in the planning and tendering of objects.

Individual logistics solutions for every application

Our plastic and composite pipes are made in-house MADE IN GERMANY. We deliver within 24 hours or even faster - just as you wish. Our service level of 99.8 % ensures that we can deliver almost any item immediately.

50

Our product portfolio includes more than 50 different pipe variants. We have the right solution for each of your projects.

5.000

More than 5.000 satisfied specialist trade partners speak for themselves. Whether sanitary, heating or solar - we stand for efficient solutions in the field of modern heating systems.

100 Mio.

We have more than 100 million pipe joints in continuous operation every year.

Pipes from Rohr, Germany

Whether flexible PE-X or dimensionally stable PE-X pipes with an aluminium jacket - all our PRINETO sanitary and heating pipes are made of cross-linked polyethylene.

Your advantage: Compared to non-cross-linked materials such as PE-RT, our pipes have a significantly higher pressure and temperature resistance in continuous operation of a drinking water or heating system.

IVT GmbH & Co. KG, with its company and production site in the tranquil town of Rohr near Nuremberg (Germany), has more than 25 years of experience in the manufacture of plastic pipes.

Production

Our modern machinery offers a wide range of possibilities. Most of the extrusion lines are only two to three years old. Our production bandwidth averages 12 mm to 32 mm.

We produce 1-, 3- as well as 5-layer plastic and aluminum composite pipes at the Rohr site. We also use separate, autarkic process water plants for all extrusion lines.

Top modern machine park and extrusion equipment.

Production of 1-, 3- as well as 5-layer plastic and aluminum composite pipes.

Use of PE-RT and PE-HD material from main raw materials.

State-of-the-art and environmentally friendly laser marking for pipe identification.

Product groups

PRINETO - THE universal pipe system for drinking water, heating and surface heating installation in the areas of sanitary, heating connection, underfloor heating and compressed air.

The patented plastic pipe system with flexible PE-X pipes and stable composite pipes up to 63 mm outer diameter ensures maximum safety and a high media flow rate.

Stainless Steel - The IVT stainless steel press system with M contour (15 - 108 mm) enables you to safely carry out durable and particularly demanding installations. The high-quality material is corrosion-resistant, particularly durable and hygienic.

our product areas.

Product groups

IVT skirting radiators provide a natural radiant heat. They heat the surfaces surrounding the room. Thus, they also prevent the formation of mold. Their use guarantees the saving of energy and, consequently, costs.

LATENTO - The solar and hot water tanks are compact, maintenance-free, easy to handle, ready for connection, hygienically optimal and highly efficient. Use the power of the sun to produce hot water or to support your heating system.

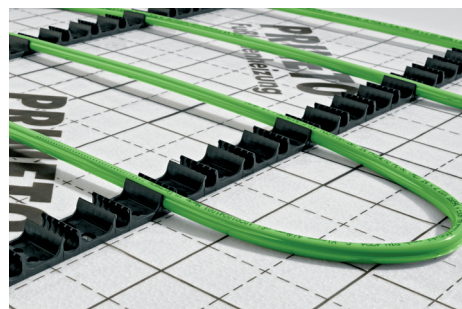

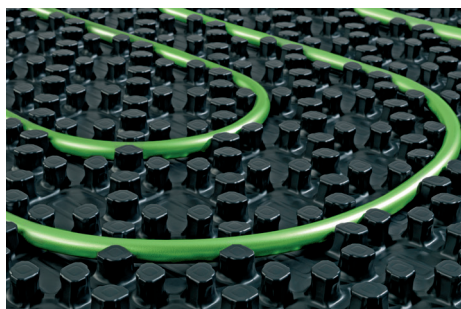

6

TACKER SYSTEM

KNOBBED BOARD

FIXED RAIL

- for the sealing of heat and impact sound insulation against screed moisture and for fixing the tacker needles

- for a particularly quick and clean installation

- for larger rooms, industrial and outdoor areas

DRY LAYING SYSTEM

VELCRO HEATING SYSTEM

THIN-FILM SYSTEM

- for lightweight construction and prefabricated houses

- for quick and practical one-man-installation

- for a feel-good climate from 22 mm installation height

ECONOMY

- New acquisitions of state-of-the-art machinery and production equipment contribute to value enhancement.
- We have an in-house quality management system.
- We attach importance to continuous testing and maintenance of our production machinery.

ECOLOGY

- We have a certified energy management system.
- Through self-crosslinking, we save 35 % of energy in the production of the ECO FLEX surface heating pipe.
- Thanks to conscious Speedy-Touch tour planning, we save 66.5 % CO2.

SOCIAL

- We attach great importance to equality, tolerance and respect.
- Health in the workplace is extremely important to us. Among other things, health days and height-adjustable desks contribute to this.
- We consciously promote the compatibility of work and family through mobile office offerings.

References

IVT pipes and solar systems are also installed outside Germany by our specialist trade partners. In Australia, China and Canada, for example, they rely on professional solutions from IVT. And for good reason! IVT supports its partners worldwide professionally and competently throughout the entire project process.

Our internal planning department is your competent contact for large-scale projects and panel heating projects.
